PROFILE

Senior Product Designer with 10 years in digital design and nearly 5 in fintech and mobile banking. I turn complex regulated flows into clear mobile experiences and reusable design-system foundations: token architecture, multi-brand theming, component contracts, accessible patterns, and implementation-ready documentation.

CORE SKILLS

Product design · Mobile banking · Design systems · Figma libraries & Variables · Design tokens · UX/UI · component contracts · multi-brand theming · accessibility (WCAG) · design-to-code · prototyping · agile delivery · AI-assisted audits & automation · motion & Lottie · HTML & CSS

EXPERIENCE

Senior UX/UI / Product Designer · FINANTEQ · fintech & mobile banking Nov 2021 - present

- Owned end-to-end UX/UI for regulated mobile onboarding and existing-customer completion flows, covering identity verification, device registration, address evidence, recoverable failures, and WCAG-aligned interaction states.
- Rebuilt the design-to-code foundation for a white-label banking VAS platform, defining token architecture, Figma Variables, theme boundaries, and component contracts.
- Used AI-assisted audits and automation to cross-check Figma libraries, code, and bank themes, turning gaps into implementation-ready documentation and specifications.
- Partnered with developers, product owners, and bank stakeholders in agile delivery: clarifying requirements, presenting decisions, prototyping, and design QA across European and Middle Eastern markets.
- Created production-ready UI, prototypes, and motion/Lottie assets within established banking design systems.

UX/UI Designer · eMedia · interactive agency Apr 2019 - Oct 2021

Designed websites and digital interfaces for client brands, from information architecture and user flows to responsive UI and production-ready assets.

Graphic Design Specialist · Agencja Reklamy Optima Mar 2018 - Mar 2019

Graphic Designer · Cyberteam Mar 2016 - Feb 2018

SELECTED WORK

Shared design-to-code contract

A drifting multi-brand platform rebuilt around shared tokens, component ownership, theme boundaries, and verified design-to-code mapping. Anonymized reconstruction.

[View case study ↗](#)

Regulated mobile onboarding

End-to-end state system for verification, waiting, recovery, escalation, and implementation handoff. NDA-safe reconstruction.
